

MEETS THE OPERATING REQUIREMENTS The Benefits of Rockford:

- The Plan at Rockford has already been approved and recommended by BRAC -- It's in the Law
- Has a Conceptual Facilities Plan already developed with the assistance of the military -- it's feasible
- The Base Plan already approved on the Airport's ALP
- Military operational requirements already environmentally approved
- Has 450 + acres of available undeveloped land for military operations compared to 352 acres at O'Hare -- flexibility
- Is a "contiguous" base with no constraints or separations.
- Plans are in place to have the required airfield facilities including a 10,000-foot runway in place by 1997

MEETS THE "3R" MISSION

Readiness

Retention

Recruitment

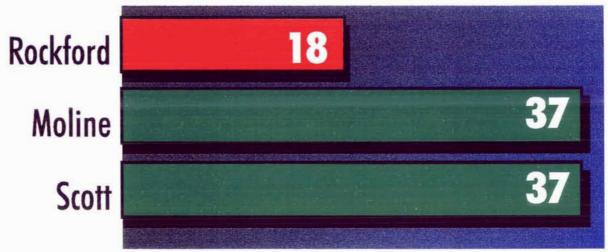

"Rockford is the only site that meets the military condition that the units would not suffer major loss of personnel."

MEETS THE "3R" MISSION

Rockford Will Achieve READINESS Sooner

Months to Achieve C-1 Status

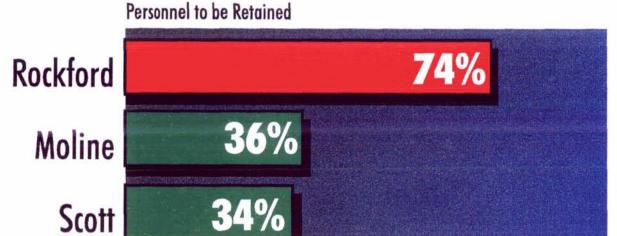

- It will Take More Than Twice as Long to Achieve Readiness at Scott or Moline
- Benefits Realized in Significant Cost Savings to the Military for Recruitment, Relocation & Retraining at Rockford

MEETS THE "3R" MISSION

Rockford Will RETAIN The Most Existing Personnel

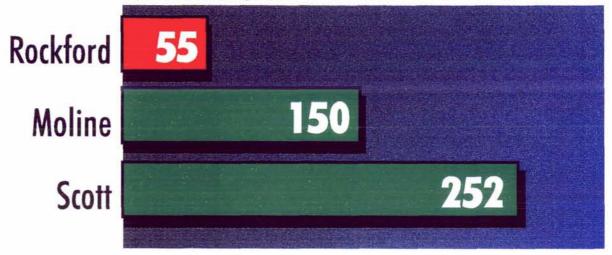

- Moline & Scott will Induce Major Loss of Personnel
- These Figures are Based on Actual Responses of Base Personnel who Responded Very Favorably to Rockford

MEETS THE "3R" MISSION

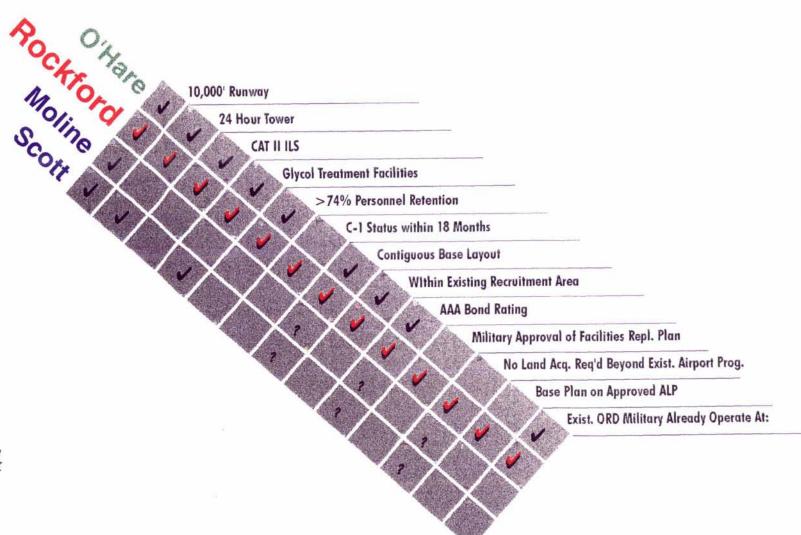

Rockford is within O'Hares RECRUITMENT Base

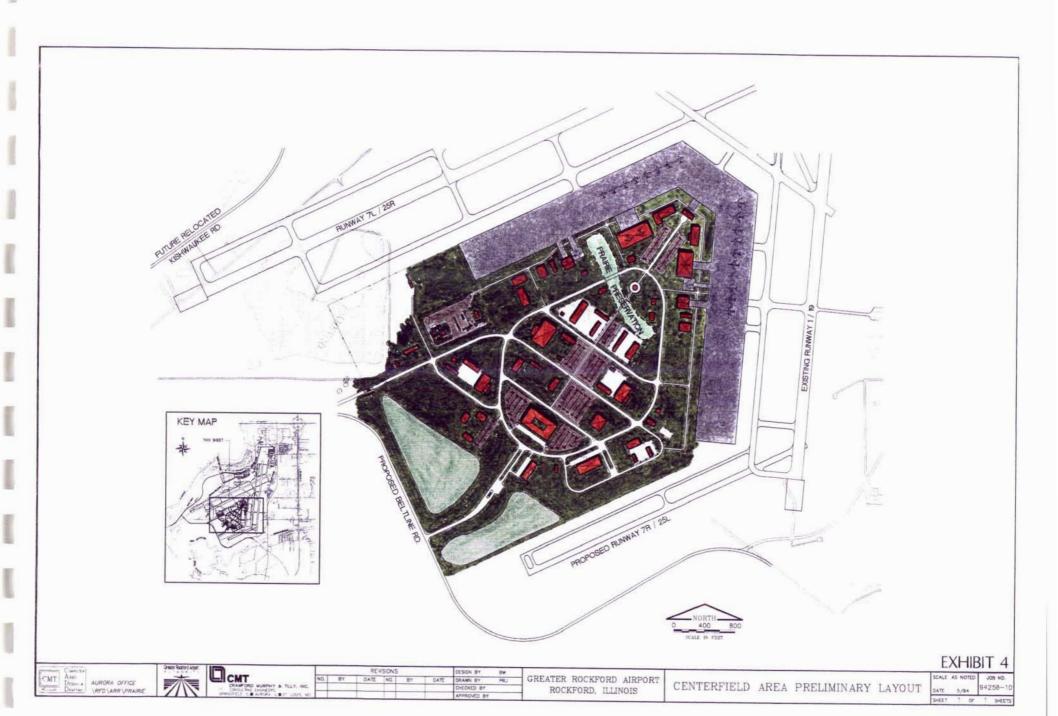

Miles From Existing Base

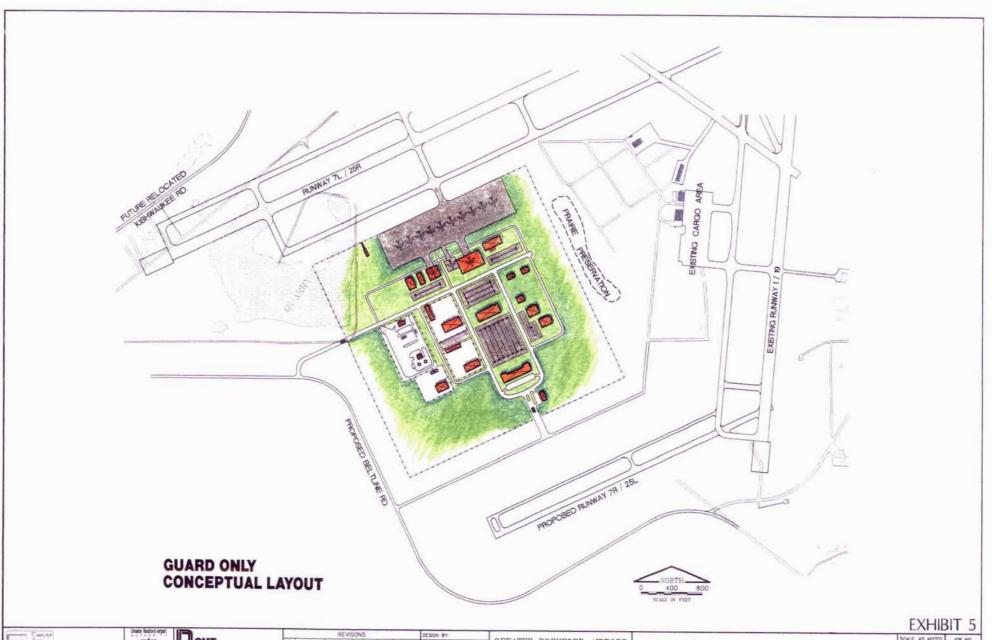

- More Retention
- Less Recruitment
- Achieve Readiness Sooner
- Significant Savings

COMMANDERS WELCOME TO THE 928TH AIRLIFT WING O'HARE IAP AIR RESERVE STATION

On behalf of the more than 1700 women and men of the 928th Airlift Wing, I would like to welcome you to O'Hare IAP Air Reserve Station. Whether your stay with us will be for years or a few hours, we are happy to have you and are committed to making your stay enjoyable. I am confident you will be pleased with the attitude and dedication of this group's members to live up to our guiding principle of "Deeds, not Words". We make an effort to accomplish those deeds with our "Chicago Style", a style that reflects the quality improvement process, customer satisfaction and employee/member accountability, as well the toughness and pride of Chicago. Once again, a warm welcome to the 928th and the Chicago area!

928th AW QUALITY, CHICAGO STYLE

C-130 HERCULES

MISSION

The C-130 Hercules primarily performs the intratheater portion of the airlift mission. the aircraft is capable of operating from rough, dirt strips and is the prime transport for paradropping troops and equipment into hostile areas.

BACKGROUND

Four decades have elapsed since the Air Force issued its original design specifications, yet the remarkable C-130 remains in production. the initial production model was the C-130A, with four Allison T56-A-11 or 9 turboprops. A total of 219 were ordered and deliveries began in December 1956. Two DC-130A's (originally GC-130A's) were built as drone launchers/directors, carry up to four drones on underwing pylons. All special equipment was removable, permitting the aircraft to be used as freighters, assault transports, or ambulances. The C-130B's introduced Allison T56-A-7 turboprops and the first 134 entered Air Force service in April 1959. C-130B's are used in aerial fir fighting missions by Air National Guard and Air Force Reserve units. Six C-130B's were modified in 1961 for snatch recovery of classified U.S. Air Force satellites by the 6593rd Test Squadron at Hickam Air Force Base, Hawaii.

FEATURES

In its personnel carrier role, the C-130 can accommodate 92 combat troops or 64 fully equipped paratroops on side-facing seats. For medical evacuations, it carries 74 litter patient and two medical attendants. Paratroopers exit the aircraft through two doors on either side of the aircraft behind the landing-gear fairings. Another exit is off the rear ramp for airdrops.

The C-130 Hercules joins on mercy flights throughout the world, bringing in food, clothing, shelter, doctors, nurses and medical supplies and moving victims to safety.

The C-130 Hercules have served other nation, airlifting heavy equipment into remote areas to build airports and roads, search for ail, and transport local goods.

As a partial response to the overwhelming role played by the tactical airlift fleet in Operation Just Cause and in the Persian Gulf War, Congress has approved the procurement of more C-130H's to replace the aging E models.

Lockheed C-130 Hercules

THE AIR FORCE RESERVE MISSION

The United States Air Force Reserve will ensure its units and individuals are prepared to accomplish assigned missions in support of national objectives.

928TH AIRLIFT WING

The 928th Airlift Wing will develop and sustain the required operational capability of its units to support gaining major commands.

ON THE JOB INJURIES

The 928th is contracted with a medical facility to provide medical services to employees who sustain a work-related injury. Initial medical care sought for non-life threatening injuries occurring during regular duty hours must be provided by Resurrection Immediate Care Center, 4900 North Cumberland, Norridge, II 60656. The clinic hours are Monday-Sunday from 0800 to 2200 hrs.

The following procedures will be followed by supervisors obtaining medical care for employees injured on the job:

- a. If there is any question whether immediate emergency medical attention is necessary, contact the Base Fire Department. Once the injury is stabilized, if hospitalization is not recommended by additional medical care is necessary(e.g., sutures in the case of a laceration), follow the procedures described in paragraphs c, d, and e below. If hospitalization is necessary, the Base Fire Department will arrange for ambulance service through the Rosemont or Chicago Fire Department.
- b. If emergency medical attention is necessary, follow the instructions described in para c, d and e below for obtaining medical care from Resurrection Immediate Care Center.
- c. Contact the Civilian Personnel Office at x5129 and the Safety Office at x6099. Provide the name of the employee and the nature of the injury. The Civilian Personnel Office will alert the clinic of the incoming injured employee. Only a designated representative from the Civilian Personnel Office can authorize treatment at the clinic, for a work-related injury, under the provisions of the directive.
- d. Injured employees must then obtain a referral from the Civilian Personnel Office, Bldg.500, Room 83, before seeking medical attention from the clinic. If the employee is unable to transport him/herself to the clinic, arrange for transportation through your own division.
- e. Complete and forward the CA-1, Notice of Traumatic Injury, the CPO within three (3) days of the date of injury. The CPO will provide copies of the CA-1 to both the Safety Office and the Health Nurse.

In case of work-related injuries which occur during non-busines hours or for which an injured employee does not obtain medical treatment immediately, but later seeks medical care from his/her own physician, he/she may still be required to be seen by a physician at the clinic. A coordinated decision in this regard will be made by the employee's supervisor, the CPO, the Health Nurse, and the Safety Office based on the prognosis resulting from the initial medical treatment and evaluation.

An employee who receives medical treatment from his/her own physician should obtain a CA-16, Authorization for Examination and/or Treatment, and a CA-20, Attending Physician's Report, prior to treatment. Upon receipt, original reports and/or bills should be forwarded to the CPO. Remember that all lost time charged to Continuation of Pay (COP) must be supported by medical evidence.

Employees should be advised that failure to comply with this directive may result in disciplinary action. A waiver of this procedure can be granted only by the Wing Commander or Civilian Personnel Office. If you need assistance, you should contact the Civilian Personnel Office at x5129.

SAFETY ORIENTATION

Our Wing Commander is concerned for your safety. The safety objective is to provide a safe work environment for all to prevent possibility of injury or property damage.

Respective supervisors will provide a safety training prior to working with equipment in your area.

All safety related training will be documented on your AF Form 55 by your supervisor. Become familiar with the Form 55, it is an important training document.

Mishap reporting on the job related illness/injuries: report all incidents (regardless of severity) to your supervisor and the Base Safety Office, X6098/9. The Safety Office will investigate the incident.

A Safety Bulletin Board is located in each functional work area. Hazard Report Forms (AF Form 457) are available at that location if hazard is discovered that needs attention and is not immediately correctable by the supervisor.

Each person acts as an on site safety inspector. If you spot a hazard or have a "closed call" report it to your supervisor so the situation can be corrected. Always take the time to correct a potentially harmful situation!

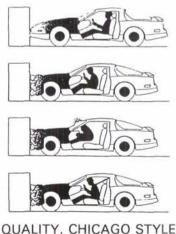

Wear your seat belt at all times while riding in vehicles; it is mandatory on or off base. SEAT BELTS DO SAVE LIVES!

In the event of injury, contact your supervisor. He/She will call the Base Fire Department, X117, if an ambulance is needed, and will notify the Safety Office & the Commander.

The base medical facility is located in Bldg. 504, across from Bldg. 500, near the main gate.

Local conditions: No private vehicles on the flight line. Left turn at main gate, has blinding sun problems in the afternoon. Walkman type radios will not be worn while operating a motor vehicle or jogging, walking, or biking on any government facility. When walking or jogging, always face traffic. The main gate is open 24 hours a day. The South gate is open only during normal arrival and departure times. A motorcycle safety course must be completed prior to motorcycle use on base.

Practice GOOD HOUSEKEEPING - It will make a difference!

QUALITY, CHICAGO STYLE 15

CHICAGO...MY KIND OF TOWN!

CHICAGO

Chicago, America's second largest city, is perfectly located in the center of the United States on the edge of Lake Michigan. The City is well planned for mixing business with pleasure. Twenty-nine miles of lakefront form Chicago's front lawn, with recreation areas, harbors and fine cultural institutions set against the backdrop of Chicago's dramatic skyline. Three of the world's tallest buildings, the Sears Tower, John Hancock Center and the Standard Oil Building, are located in Chicago. Chicago is, in fact, and impressive outdoor gallery of modern architecture and sculpture. There is diversity in the city's entertainment from ethnic restaurants in old neighborhoods to classic cuisine in downtown settings: jazz, blues and night life of Rush Street: plus the acclaimed Chicago Symphony Orchestra and Lyric Opera: and innovative theater that typifies Chicago Style. Michigan Avenue with its showpiece Water Tower Place shopping center, One Magnificent Mile and State Street with its major department stores are regarded as the major shopping thoroughfares.

CHICAGO NORTH/NORTHWEST

This vast region demonstrates diversity. It includes a string of north shore suburbs stretching along Lake Michigan from Evanston, Home of Northwestern University, to Lake Forest; centers of business development and residential expansion like Woodfield and Schaumburg; the recreation areas surrounding Fox Lake and the Chain O'Lakes; Rockford, Illinois second largest city and Galena, with its picturesque setting near the Mississippi River. Varied Attractions like Six Flags Great America family entertainment center, Arlington Park Race Track, Poplar Creek Music Center and Ravinia Park, summer home of the Chicago Symphony Orchestra, and unique shopping from the Spanish style Plaza del Lago in Wilmette, to Woodfield Mall, the antique shops of Winnetka, Long Grove and Woodstock, and Bloomingdale's "Old Town" add to the area's appeal.

CHICAGO/O'HARE

The Chicago/O'Hare region surrounding the world's busiest airport includes a portion of Chicago, Des Plaines, Rosemont and Schiller Park. Added to the advantage of its facilities and convenience to the airport are the wealth of restaurants and accessibility to major suburban attractions and downtown Chicago. The region is linked to the city by new rapid transit service and expressways; the trip to Chicago for business or simply pleasurable break can be made in 25 to 45 minutes.

CHICAGO WEST

The West region is highlighted by the scenic Fox River Valley, encompassing the towns of Geneva, Batavia and St. Charles (all well known for their antique shops) and the burgeoning corridor of high technology enterprises and corporate headquarters in Oak Brook and Naperville. Adding to the attractiveness of the region are restaurants to suit any taste, world class shopping at Oakbrook Center, polo at the Oak Brook Polo Club, the Brookfield Zoo with its spectacular new Tropic World habitat, Maywood Park Harness racing track and the Prairie Style Architecture of Frank Lloyd Wright.

CHICAGO SOUTH/SOUTHWEST

The South/Southwest region is one of the metro-Chicago area's strongest centers of heavy industry, primarily steel making, and the location of the Port of Chicago, a busy international trade port. In addition, it features a variety of entertainment centers like the Holiday Star Theater, the Sabre Room, Drury Lane South and the Candlelight Dinner Playhouse, presenting top name performers and major plays. The area is also well known for its race tracks-Hawthorne, Sportsman's and Balmoral Park; its fine old suburbs like Flossmoor, Homewood, Oak Lawn; areas of growth such as Orland Park, Hickory Hills, Burbank and Chicago Ridge.

SIGHTSEEING

CHICAGO AREA:

Starting and touring on Michigan Ave at Chicago Ave. the following sites can be seen most within a mile radius. The Water Tower, Adler Planetarium, Art Institute of Chicago, Field Museum of Natural History, Grant Park, Museum of Science & Industry, and the Shedd Aquarium.
